

How many online workshops have you attended in this blended course?

This is my first attendance

Just one, this is my second time

I participated in 2-3 workshops, incl. today

All of them, including today

What does come first to your mind when you hear "Quality in (Digital) Youth Work?"

What should be the starting point(s) for your organisation's digital youth work strategy?

How advanced is your organisation in the following strategy building blocks?

What are you personally passionate about or interested in the digital realm?

Innovation in my work

empowering young people to be creators of digital worlds

Digital youth policy footprint

Exploring increasing capabilities of AI tools which can be used across wide variety of domains.

Simulation, games, AI

I'm passionate about using digital tools for social impact, especially in youth empowerment and creative education.

Youth capacity building

digital appears when the phygital gets difficult to link to the purpose. The one (digital) supports the other (physical/ basic)

What are you personally passionate about or interested in the digital realm?

It is the future natural room for the young generations

Using AI for learning. Creating our own platforms and tools.

I want to stay up to date, continue learning myself and help and create

Virtual facilitation for intercultural groups

the possibility to motivate youth to participate if programs are planned/designed in a fun way /games/

I'm passionate about digital storytelling and how technology can connect and inspire young people across the world.

I'm "interested" in making learning easier—whether it's languages, programming, exam prep, or just satisfying curiosity. So anytime someone wants to improve their skills or understand something better

TO INTERACT -
SHARING AND CREATE
WITH OTHERS FROM
DIFFERENT PLACES

What are you personally passionate about or interested in the digital realm?

Digital education and upskilling, ethical AI and digital well-being, creative uses of technology

The possibilities of innovation

I'm curious of the broad opportunities that digital technology avails for connecting people all over the world, creating solidarity for sustainability, climate change also the intercultural discussions

To find a method or platform for youth to express emotion

Exploring all the main tendencies and support training in digital skills and competences

reading research and can make experiments

Awareness of impacts.

to close the digital divide

What are you personally passionate about or interested in the digital realm?

I am interested in supporting inclusivity through digital youth work.
